

PRAVEEN KUMAR

Machine Learning And Full Stack Developer

Dhanbad, 826001 • +91 9504904499 • praveen.pr105@gmail.com

Portfolio: praveen105.netlify.app • **LinkedIn:** [praveen105](#) • **GitHub:** [praveen-kumar-007](#)

CAREER OBJECTIVE

A passionate and self-driven learner with a deep interest in development and technology. Continuously building skills through hands-on projects and real-world problem solving. Committed to delivering high-quality results, adapting quickly to new challenges, and contributing meaningfully to team goals in a fast-paced tech environment.

SKILLS & CORE COMPETENCIES

Skills: Python, Pandas, NumPy, Scikit-learn, TensorFlow, Keras, OpenCV, Machine Learning, Deep Learning, Data Analysis, Data Visualization, CNN, Image Classification, React JS, Node JS, HTML, CSS, JavaScript, SQL, Database Management, Google Cloud, Git, GitHub, Problem-Solving

Machine Learning & Deep Learning	Python (Pandas, NumPy, Scikit-learn)	TensorFlow, Keras & OpenCV
Data Analysis & Visualization	CNN & Image Classification	Full Stack Development
React JS, Node JS	Web Development (HTML, CSS, JS)	SQL & Database Management
Google Cloud Computing	Git & GitHub Version Control	Problem-Solving

EXPERIENCE

Full Stack Developer (Freelance) Jun 2026 - Aug 2026

Multimarg Private Limited | Remote

- Architected and developed a comprehensive full-stack logistics platform, designing robust RESTful APIs to handle complex booking, billing, and carrier coordination workflows.
- Engineered a secure Role-Based Access Control (RBAC) architecture using JWT authentication, enforcing strict data isolation and governance across admin, finance, and logistics modules.
- Optimized application performance and database schemas, ensuring scalable and seamless data flow for enterprise operations.

IIT ISM Dhanbad - AI/ML Intern Dec 2025 - Jan 2026

Dhanbad, India

- Researched methane gas detection in coal mining environments using sequence models and hybrid CNN-LSTM architectures.
- Designed and compared LSTM, GRU, Bidirectional LSTM, and CNN-LSTM models for methane detection.
- Implemented sensor preprocessing pipelines and handled noisy time-series data for early warning signals.

IIT BHU - AI/ML Intern Jun - Jul 2025

Varanasi, India

- Developed a machine learning model for predicting energy consumption in smart buildings.
- Worked under the mentorship of Dr. Vinayak Srivastava, focusing on sustainable tech solutions.
- Applied advanced data handling and preprocessing techniques for performance analysis.

AI and Data Analytics Intern Jul - Aug 2025

AICTE, Shell & Edunet Foundation | Virtual

- Completed the Skills4Future Program focused on AI, Data Analytics, and Green Skills.
- Gained hands-on experience with data-driven techniques and applied analytics to sustainability-related challenges.

Machine Learning Intern Aug - Sep 2024

Encryptix | Remote

- Gained hands-on experience in applying machine learning concepts from development to deployment.
- Contributed to team projects, demonstrating strong analytical and problem-solving skills.

PROJECTS

Multimarg Logistics Platform [Live Site]

- › Built a scalable B2B logistics application, focusing on modular component design, responsive UI/UX, and robust backend architecture.
- › Implemented secure Identity and Access Management (IAM) with token-based authentication to manage granular permissions across varying operational roles.
- › Developed dynamic administrative dashboards utilizing advanced state management for efficient data visualization and centralized service tracking.
- › Technologies: React, Node.js, Express.js, MongoDB, RESTful APIs, JWT.

Methane Detection in Coal Mining

- › Developed a system for gas detection and early warning during an internship at IIT (ISM) Dhanbad.
- › Utilized sequence models (LSTM, GRU, Bi-LSTM) and CNN-LSTM for anomaly detection in sensor data.
- › Technologies: Python, TensorFlow, Keras, Pandas.

Brain Tumor Detection Model

- › Developed a CNN-based model to classify MRI brain scans for tumor detection with high accuracy.
- › Involved image preprocessing, custom CNN architecture design, and model evaluation.
- › Technologies: Python, TensorFlow, Keras, OpenCV.

Energy Consumption Prediction

- › Built an ML model to predict energy usage in residential smart buildings during an IIT BHU internship.
- › Involved time-series analysis, feature engineering, and regression model comparison.
- › Technologies: Python, Scikit-learn, Pandas.

SP Kabaddi - Club Website [Live Site]

- › Built the production website for SP Kabaddi Group, featuring news, player registration, and an admin dashboard.
- › Implemented an in-built player ID card generation feature and Cloudinary integration.
- › Technologies: React, JSS, Vite, Node.js, MongoDB.

Dhanbad District Kabaddi Association Website [Live Site]

- › Developed the official governing body website for kabaddi in Dhanbad.
- › Features super-admin/admin roles, content management, registration workflows, and ID card generation.
- › Technologies: React, JSS, Vite, Node.js, MongoDB.

EDUCATION

Bachelor of Technology in Computer Science	2022 – 2026 8.5 CGPA
Swami Vivekananda University Kolkata, West Bengal	
Intermediate (12th Science)	2022 79%
JLSM DAV College Bhaga Dhanbad	
Matriculation (10th)	2020 78%
Rajkamal Saraswati Vidya Mandir Dhanbad	

CERTIFICATIONS

Full Stack Development - IBM
Introduction to Machine Learning - NPTEL
ML with Python - FreeCodeCamp
Artificial Intelligence Primer - Infosys
Getting Started with AI - IBM SkillsBuild
Google Cloud Computing - NPTEL
Implementation of Algorithms - Ardent

ACHIEVEMENTS

2nd Position, IBM Full Stack Training Final Project Competition (College Level)
Jharkhand State Kabaddi Winner
Dhanbad District Kabaddi Referee
Media Incharge, Dhanbad District Kabaddi Association

LANGUAGES

English
Hindi
Bangla

HOBBIES

Writing poems (Hindi)
Playing Kabaddi
